## About Sudco...

Sudco International is one of America's oldest and largest importer/ distributor of motorcycle replacement parts and high performance accessories. For decades we have provided dealers with the best available parts and services so they can serve their customers even better. We will continue to do this now and into the future, thanks to your continued support in allowing us to provide you the high quality parts you need. Please do not hesitate to call on us should you have any particular needs, problems or questions.. We will do everything we can to make sure Sudco remains one of your main sources for quality replacement parts and accessories.

Sudco International is a major importer and distributor in America for top brand replacement parts, many of which are from the original equipment manufacturers that provide the OEM parts to the major Japanese and European manufacturers. Our product line includes quality products from Keihin, Mikuni, ART, JE, NGK, Vesrah, RK, Sunstar, Nology, Dyateck, Pingel, K&N, Motion Pro and others.

Some of the products in our Sudco Catalog are sold for Off-Road and Racing Use Only and as such are not legal for use on vehicles operated on public highways and in locations where such laws may apply. These products include Aftermarket Carburetors and Carburetor Kits, Replacement Carburetor Jetting, Fuel Injection and Ignition Tuning Modules, and Aftermarket Exhaust Systems. Please contact us should you have any questions regarding the legality of non-original replacement parts

## California Resale Certificate

**I HEREBY CERTIFY:**

1. I hold valid seller's permit number: \_\_\_\_\_

2. I am engaged in the business of selling the following type of tangible personal property:

\_\_\_\_\_

3. This certificate is for the purchase from \_\_\_\_\_ of the item(s) I have listed in paragraph 5 below. [Vendor's name]

4. I will resell the item(s) listed in paragraph 5, which I am purchasing under this resale certificate in the form of tangible personal property in the regular course of my business operations, and I will do so prior to making any use of the item(s) other than demonstration and display while holding the item(s) for sale in the regular course of my business. I understand that if I use the item(s) purchased under this certificate in any manner other than as just described, I will owe use tax based on each item's purchase price or as otherwise provided by law.

5. Description of property to be purchased for resale:

6. I have read and understand the following:

**For Your Information:** A person may be guilty of a misdemeanor under Revenue and Taxation Code section 6094.5 if the purchaser knows at the time of purchase that he or she will not resell the purchased item prior to any use (other than retention, demonstration, or display while holding it for resale) and he or she furnishes a resale certificate to avoid payment to the seller of an amount as tax. Additionally, a person misusing a resale certificate for personal gain or to evade the payment of tax is liable, for each purchase, for the tax that would have been due, plus a penalty of 10 percent of the tax or \$500, whichever is more.

## K&N Recharger® Filter Care Service Kit

This six step maintenance system is designed to recharge any K&N Filtercharger® Air Filter. It restores air flow efficiency so your Filtercharger® performs like new.

<b>Recharger® Filter Care Service Kit</b>	<b>K&amp;N No.</b>	<b>Order No.</b>
Kit includes 6-1/2 oz. aerosol spray oil,	99-5000	<b>005-540</b>
12 oz. filter cleaner and service decal.		

### Recharger® Filter Care Service Kit

Kit includes 8 oz. squeeze oil, 12 oz. filter cleaner and service decal. Same as **005-540** except has squeeze bottle instead of spray can.

## K&N Filtercharger® Oil

The only oil specially formulated to work with in combination with the cotton fabric in K&N Filtercharger® elements providing outstanding air filtration. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric unit until the element is cleaned with K&N Air Filter Cleaner.

Power-Flo Fuel Valve

## Pingel Power-Flo™ Fuel Valves

Pingel® Fuel Valves provide more fuel flow than OEM petcock. This is a must with drag, racing and high performance vintage applications. Manufactured from billet with high quality stainless steel components. Power-Flo™ fuel valves feature highly polished aluminum or highly polished chrome-plated brass finishes with either 1/4" NPT, 3/8" NPT or HD metric thread 22mm. 5/16" outlet in single, dual or triple with or without reserve. Fuel Valves listed sold each. **Note: See page 262-263 for additional details.**

# Cam Chain Tensioners

## APE Manual Cam Chain Tensioners for Vintage Applications

A Must for any kind of performance riding. APE manual cam chain tensioners are CNC machined from billet alloy to exact tolerances for perfect fit. Designed to replace the automatic and hydraulic tensioners on high performance engines. The automatic adjusters can back out when the throttle is suddenly closed at high rpm. This allows the cams to go momentarily out of time and can result in bent valves and/or serious engine damage. Hydraulic tensioners have a tendency to put too much tension on the chain guide under high rpm/high oil pressure conditions resulting in premature wear. Both problems can be eliminated with the installation of the APE manual cam chain tensioner. No matter what the engine does, the cam chain tensioner will remain constant. Cam Chain Tensioners are sold each.

## APE Kawasaki Cam Chain Idler Adapter

This adapter allows the use of later model GPz 1100 or KZ1000J cylinder head on earlier model KZ900/KZ1000 lower end. It maintains the roller style cam chain. This is the only modification necessary to install the big valve head on early motor. Use with OEM KZ sprockets or high performance aftermarket versions.

## Motion Pro 4-Stroke Leakdown Tester

Checks percentage of cylinder leakage in a 4-stroke engine. Tester includes 10, 12, and 14mm spark plug adapters, regulator and gauge.

Order No. 950-401

## Heavy Duty Cylinder Head Studs

Heavy duty cylinder studs are necessary to prevent head gasket leakage in high compression and turbocharged engines. Stock studs are made from poor material that will stretch and allow gasket leakage. APE studs are made from heat treated chrome moly and have rolled threads for maximum strength. Sold in sets.

## Rustol

Rustol gives excellent results with little or no work required. It is safe and non-corrosive to all metals, rubber coatings and paint. While destroying existing rust, it forms a protective bond that prevents new rust from forming later. Rustol is odorless unlike conventional rust removers, and is shipped in a concentrated form. Believe it or not, the same batch of Rustol can be used many times.

**Note:** Rustol should be diluted according to instructions before use.

## Keihin FCR (Flatslide CR) Racing Carburetors

Following in their tradition of high technology and performance, Keihin's latest carburetor design for racing is the FCR designed for downdraft engine design use. Features include a flatslide throttle operating on roller bearings with progressive linkage for smooth operation and control. Smoothbore venturi for maximum air flow. This is the ultimate racing carburetor for use on downdraft engines as found on many popular sportbikes destined for serious competition. Along with the highest level of technology available, the FCR's have proven there advantage with race wins around the world.

## Recommended Carburetor Size for Engine Displacement

Engine Displacement (cc)	Available FCR Carburetor (Venturi Diameter in mm)
400cc	33mm
600cc	33-35mm
750cc	35-39mm
1000cc and up	37-41mm

This is the recommended carburetor size for a 4-cylinder engine that is tuned for road race use. Stock engines should use the next smaller size and engine tuned to maximum output, may use one size larger.

**IMPORTANT:** Legal in California only for racing vehicles which may never be used upon a highway.

# KEIHIN CR Special Racing Carburetors

## Keihin Roundslide CR Sidedraft Racing Carburetors

The choice of Team Honda for years on all there in-line 4-cylinder race bikes in Superbike, World Championship Endurance and Formula One classes. You'll find the power you need with these Keihin Roundslide CR carburetors. Designed for use on sidedraft four-stroke motorcycle engines. Features include: Improved throttle response; direct linkage to slides provides more precise control than vacuum slide carburetors. A 10% horsepower gain can be expected; Smooth venturi design produces stronger power than original equipment carburetors using butterfly throttle valves. Race fuel capability. Available for gasoline or alcohol use. Rejetting required when using alcohol or methanol, kit available as an option. Ready to bolt-on and run, these kits come complete with mounting spigots, velocity stacks and velocity stack covers. Available sizes: 26, 29, 31, 33, 35, 37 and 39mm. Intake length can be adjusted with optional mounting adapter spigots. Most replacement and tuning parts are available, please see CR Special exploded view, parts list and parts/accessories on [page 124-131](#).

## Keihin PWK Series Carburetors

Producing power without compromise, Keihin PWK carburetors have set the standard for ATV, motocross, and offroad racing carburetors. Because of their great performance, they come stock on a lot of leading brand names. PWK features include:

- Chromed semi-flat (D shape) throttle valve for excellent response and more flow at high RPM.
- Throttle Bores sized to give maximum power.
- Quad Vents - Eliminates post jump bogging from fuel plugged vent passages.
- PWK Air Strikers - Directs air to main nozzle for improved signal and throttle response.

PWK carburetors are available in Standard (Non Air Striker) and Air Striker/Quad Vent. Sold each.

### Cable Adjuster Holder

Cable adjuster holder to be used with Keihin PE20-28 Throttle Stop Screw (#42).

Order No. **021-799**

### PE20-24mm Jet Needles

Jet Needle selection notes: (see chart at bottom)

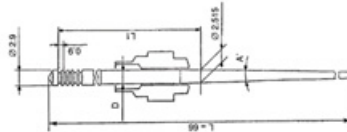

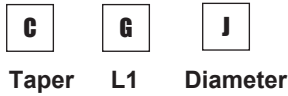

1. Taper and diameter are the 2 primary dimensions. Larger diameter is leaner at low speeds.
2. Larger taper angle becomes richer faster as speed increases.
3. If diameter and taper are the same, larger L1 will stay leaner longer.
4. A higher clip position will stay lean longer.

## OEM-N427-48-□□□ Series Conversion Chart

\* Not all OEM needles are available as option needles.

### 1. How To Read Marks

#### 1) Mark on OEM Jet Needle (6 digits)

- 1st digit of MARK on OEM's tells you the KEIHIN Part Number
- NEXT TWO DIGITS (2nd & 3rd) tell you TAPER angle.
- NEXT TWO DIGITS (4th & 5th) tell you DIAMETER of needle.
- LAST DIGIT (6th) tells you L1.

#### 2) Mark on Option Jet Needle (3 digits)

- 1st digit is for TAPER angle.
- 2nd digit is for L1.
- LAST digit is for DIAMETER.

### 2. Conversion Table

## SI-1 Complete Fuel System Cleaner

SI-1's injector and valve detergent is a concentrated package of the most powerful high-temperature detergents available to clean gasoline fuel injectors or carburetors, intake valves and combustion chambers. and can clean injectors to nearly 100% efficiency in one treatment. The cleansing effect on injector deposits can raise fuel economy 12% or even greater depending on the condition of the injectors. SI-1 also contains detergents and a synthetic upper cylinder lubricant which will help clean pollution control valves and can reduce octane requirements by two numbers. SI-1 also protects the fuel system from rust. Sold in 15 fl. oz. bottle.

## Mikuni RS Smoothbore Carburetors

Designed for in-line four cylinder performance motorcycles, the Mikuni RS Series Radial Flat Slide Carburetors offer superior horsepower gains with their maximum flowing smoothbore induction tract and radial flat slide design. An adjustable accelerator pump system helps to provide instant throttle response, particularly in the lower RPM range. The RS Series Carburetors feature a compact design which is 25% lighter than other performance Carburetors and uses readily available Mikuni jets. Available sizes : RS34, RS36, RS38 and RS40mm.

### Features of the RS Series Carburetors

- Adjustable Pump Adjust Screws. Sets ON and OFF operation of accelerator pump in relation to throttle slide position.
- Throttle Return Spring. A choice of positioning pegs allow adjustment of spring tension.
- Idle Adjustment Screw. Controls engine idle speed.
- Adjustment Accelerator Pump. Squirts fuel into carburetor venturi when throttle is opened to improve engine response.
- Starter System. Provides fuel enrichment for cold engine starting.
- Adjustable Pump Spray Nozzle. Shoots fuel directly into the intake tract for immediate engine response.

### Features of the RS Series Carburetors

- Jet Needle Clip. Easy adjustment feature for quick adjustment.
- Flat Throttle Valve Design. Provides the strongest signal for precise and instantaneous throttle response.
- Float Bowl Vent. Allows atmospheric pressure into float bowl for fuel flow.
- Smooth Throttle Bore/Venturi. Produces the optimum air and fuel mixture flow at all RPM's.
- Genuine Mikuni Jets and Tuning Components. Provides for precise fuel metering.
- Pilot Air Jet. Use in conjunction with the Pilot Fuel Screw for tuning of mixture at idle to 1/4 throttle.

## Ordering RS Smoothbore Carburetors

Available in 34, 36, 38 and 40mm bore sizes with different carb spacing for particular bike applications and with different jetting to match engine modifications. Please see application chart listing on next page. **Note:** These are guidelines only. Specifications are subject to change.

## RS Series Notes

Mikuni No. (part number) in application chart above denotes size in millimeters. RS34-D21 = RS34.

\*\* Uses left side throttle linkage.

• Applications (General) - These are guidelines only. Specifications are subject to change.

• RS34 and RS36 Carburetors may use Jet Needle #9DZH05.

• RS38 and RS40 Carburetors may use Jet Needle #9CHY10.

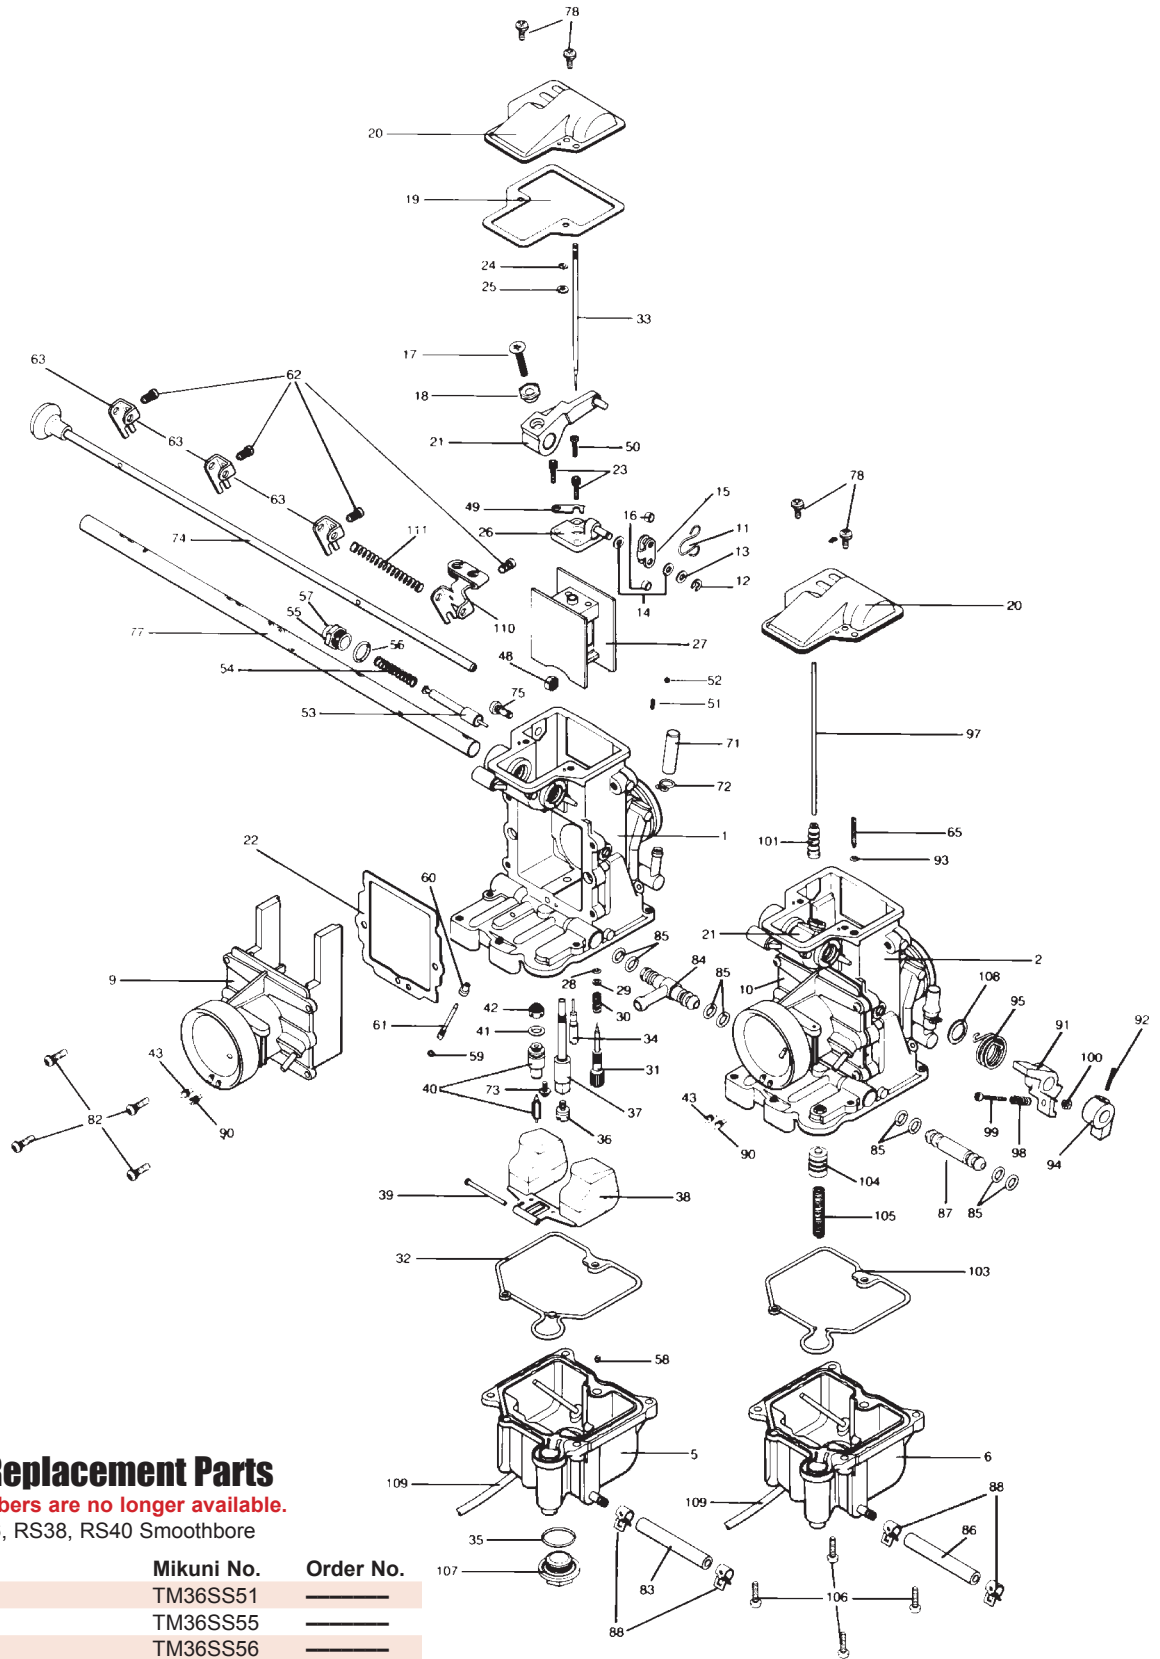

Pre Kawasaki KZ1000J models require qt 4 mounting flanges.

Order No. 005-866, Qt 4 set.

# Mikuni TM Series Flat Slide

## Mikuni TM Flat Slide Carburetors

Mikuni's original FLAT SLIDE Carburetor. The TM series Carburetors provide significant performance improvements over older round slide Carburetors. Air flows faster and smoother through the TM series venturi due to the flat slide design and the jet blocks which help create smooth bore effect. The high velocity of the air flow means a stronger vacuum at the needle jet providing more precise metering and better throttle response. TM Flat Slide Carburetors are sold pre-jetted, jetting change and throttle valve change. (see listing below) Please specify when ordering.

## Mikuni TM Pro-Series Flat Slide Carburetors

The TM Pro-Series Carburetors feature proven performance gains with a hand machined venturi area. Testing shows Pro-Series carburetor design will out flow many other factory produced Carburetors by a minimum of 10% or more. This venturi design also provides a higher air speed rate at lower RPM's which results in a much stronger, smoother, wider power band. Sold pre-jetted or to customers jetting request. Please specify when ordering.

## VM Series Round Slide Single Carburetors

These are the most popular high performance singles carburetor in the sport of motorcycling. Mikuni's VM series round slide single Carburetors have proven themselves as the performance standard for use in any single cylinder motorcycle or ATV applications for motocross, enduro and trail riding, to flat track racing and road racing on both 2-stroke and 4-stroke engines.

Performance features for the VM Series Carburetors include a large selection of bore sizes for increased fuel mixture flow to match engine modifications. The VM Series offers a wide range of tuning components to allow precise fuel mixture metering in any application, at any throttle setting, under any riding condition. VM Series Carburetors are sold pre-jetted. (see Standard Jetting Specifications below) Special Jetting also available, see next page.

**Please Note:** Changes and jetting modifications are for use only on racing machines or similar off-road vehicles where pollution laws are not in effect. Not legal for vehicles operated on public highways in the State of California or other areas where similar pollution laws may apply.

## Sudco Special Jetting for VM Series Round Slide Single Carburetors

Sudco can also "Special Jet" any Mikuni VM series carburetor for your particular application. Below is the information you will need to provide our Carburetor Technician Specialist's so they can provide you with the correct carburetor and jetting.

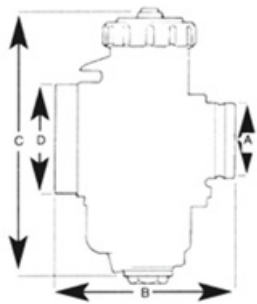

1. Carburetor Size (mm)
2. Type of Carburetor: Clamp-on, Spigot Mount, Flange Mount, Flat-Slide, etc.
3. Application: Model, Year and cubic centimeters. (125cc, 250cc, etc.)
4. Modifications done to engine: Explain in detail, example - big bore kit with cc change, ported cylinder, etc.
5. Type of use for motorcycle: Street, Drag Racing, Road Race, Motocross, Offroad, Enduro, etc.
6. Type of Fuel used
7. Climate conditions: sea level, area of use, high altitude, etc.

Most popular settings are already available. However, if you have modifications done, it is necessary to follow the guidelines to insure receiving the proper jetting at the closest range.

Use the following part numbers when ordering for special jetting or throttle valve change.

## Priming Nozzle

For oil injection. Sold each.

VM34/181 Order No. 007-690

## 40° Cable Adjuster Assembly

Includes rubber cap, two locknuts, cable adjuster and 40° tube. Works on Keihin and Mikuni carburetor caps.

Order No. 007-730

## TM Power Jet Kit

The Power Jet Kit is used on 2-stroke engine applications to improve mid-range throttle response and add additional fuel to wide open throttle running conditions. Easily installs on TM series Carburetors. (#80, #100 and #120 sized jets included) Sold as a kit.

Order No. 002-041

## 90° Cable Adjuster Assembly

This adjuster has threads on one end, the other end swivels. Includes rubber cap, locknut, cable adjuster and 90° tube. Works on Keihin and Mikuni carburetor caps.

Order No. 007-731

## 45° Cable Adjuster

45° Cable Adjuster fits all Mikuni VM Carburetor Series #2 in Mikuni VM parts list Works on all Mikuni VM Carburetor Series Carbs. Adjuster, locknut, and rubber cap all sold separate.

## Quick Reference Chart for Needle Selection (Average Performance Chart)

**Note:** The following listing of needles are simply the average performance of a needle between 1/4 and 3/4 throttle opening. Needles are constructed such that a given point on a needle, (for example, at 3/4 throttle opening), the needle may be found to perform richer at this given point when compared to the same given point on another needle, but according to the average performance chart, the needle should perform leaner.

**For example:**  
Average Performance Chart  
Leaner

Richer

At D-5 (A), the taper diameter is 1.915, at D-5 (B), the taper is 2.040; the taper diameter at D-5 (A) is smaller than D-5 (B). At this given point of throttle opening (3/4), needle #6DH4 will run slightly richer than #6FJ6, but the average performance will still be that #6DH4 will be a leaner needle because it will perform leaner at more given points than a #6FJ6. Consequently, if you are concentrating on a specific throttle opening for competition use, be certain to check the taper diameter at that point of throttle opening.

For a more detailed and comprehensive explanation of the various needles as to their taper diameters at given points, see **NEEDLE TAPER DIAMETER DIMENSION CHARTS**.

### THE QUICK REFERENCE CHART FOR NEEDLE SELECTION

was prepared by measuring the needles as to their diameter at given points. Given points are 10mm apart from each other.

By computing the different measurements and arranging them in order of taper thickness or thinness, three categories for application of needles were determined.

#### Category I - Competition.

For example, motocross racing and desert racing where mid-range throttle operation is vital.

#### Category II - Racing.

For example, Road racing, where 3/4 to full throttle operation is vital.

#### Category III - Overall.

For example, Street riding, where the full range of throttle operation is required.

## Two Types of needles

### Single Taper Type

### Double Taper Type

## Jet Needles

The Jet Needle controls the fuel mixture in the mid-range (1/4-3/4) throttle position. The taper of the needle determines the amount of fuel. For example, the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel will be drawn.

Two Basic Types of Needle Jets

## Needle Jets

The needle jet is the main fuel passage to the main bore (venturi) of the Mikuni carburetor. Depending on the inside diameter of a specific needle jet, this will also effect the function of the needle. Therefore, needle jets and jet needles act together as the main system in controlling the amount and mixture of the fuel which is drawn in mid-range (1/4 - 3/4) throttle operation.

On the following application chart, it is noted that certain needle jets require a specific type of main jet because there are two types of main jets (4/042 Large Hex & N100.604 Large Round) that have different fuel flow rate characteristics. Also, needle jets are available not only in types, but series and sizes. Mikuni series numbers for style of the needle jet. There sizes (inside diameter size) within each series are listed according to a letter-number combination.

The letter shows the inside diameter size in increments of .050mm.

For example, the difference between P-2 and Q-2 is that the inside diameter of needle jet size Q-2 is .050mm greater than P-2.

The number shows the inside diameter size in increments of .005mm. For example, the difference between P-2 and P-4 is that the inside diameter of needle jet size P-4 is .01mm greater than P-2.

**Exception:** (-5) is measured as an increment increase of .005mm. For example, the difference between P-4 and P-5 is that the inside diameter of needle jet size P-5 is .005mm greater than P-4.

# Mikuni VM Roundslide Throttle Valves

## Throttle Valve (Slides)

The Throttle Valve (slide) affects the air-fuel mixture ratio between 1/8 and 1/2 throttle, and especially between 1/8 and 1/4 throttle. Throttle Valves come in various sizes called cutaway. The larger the cutaway (size), the leaner the fuel mixture. The smaller the cutaway (size), the richer the mixture. Throttle Valves are sold each.

## BS30/97 Air Jet

Meters the air flow through the passage to and into the needle jet.  
It acts as a fine tuning component in regulating the fuel-air mixture.  
This is especially important when a bleed type needle jet is used.

**Applications:** VM26 thru VM44 spigot carburetor, RS, TM,  
VM29/VM33 Smoothbore.

## Air Cut-Off Valve Sets **NEW**

Direct OE style replacement carburetor air cut off valve set. Includes; diaphragm, spring and o-ring. Located on the side of the carburetor, the air cut off valve prevents lean fuel mixture (backfire) when decelerating. Temporarily closes the pilot jet airway to provide a richer mix as the throttle closes. Sold in sets for one carburetor.

# Fuel Injection Controller & Air/Fuel Ratio Monitor

## Dynatek (F.I.) Fuel Injection Controller

The Dyna Fuel Injection controller is a plug-in module that offers 3 user selectable base fuel curves. Designed to improve engine operation and can be modified to suit a wide variety of modifications. These adjustments are made via 3 potentiometers that adjust the fuel curve in the proper ranges for the application. Fuel mixture can be enriched or leaned as required. The Dyna F.I. Controller use the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications to the stock ECU and removing the Dyna F.I. Controller returns the vehicle to the factory settings. Available for the following models:

# Fuel Valves

## Pingel Power-Flo™ Fuel Valves

People who demand performance demand Pingel® Products. Pingel Fuel Valves provide more fuel flow than OEM petcocks. This is a must with drag racing and high performance applications. Manufactured from billet with high quality stainless steel components. Power-Flo™ fuel valves feature highly polished aluminum or highly polished chrome-plated brass finishes with either 1/4"NPT, 3/8"NPT or HD metric thread 22mm. 5/16" outlet in single, dual or triple with or without reserve. Fuel Valves listed sold each.

## K&N ATV Precharger

K&N Precharger is a specially designed filter wrap made to extend the service interval of your K&N Air Filter when used in very dusty conditions. Made from durable polyester material containing uniform micron openings. The Precharger will stop dirt particles as small as .500" diameter, yet only adds a 10% restriction to the airflow of the filter. The Precharger is designed to be run dry and can be cleaned with K&N Filter Cleaner. The Precharger is custom made to fit each application. Elastic openings assure that the Precharger will stay in place. Sold each.

## PC Racing Filterskins™

Filterskins are an extremely thin but durable air filter cover. While allowing maximum airflow, an oiled Filterskin will catch 90% of the dirt that tries to pass through the air filter. Between races or between rides, simply pull off a dirty Filterskin and slide on a clean one. Filterskins are extremely elastic and each size will expand over a wide range of air filters sizes. Sold each.

## Pro-Seal™ Airbox Kits for Honda CR/CRF

In addition to filling the gap between the air filter and airbox, this special Pro-Seal™ is cut around and the same height as the nipples inside the airbox. This creates a perfectly flat sealing surface for the air filter. This flat sealing surface eliminates the tendency that the nipples have of pulling the filter away from the cage when the filter is tightened. The Air Boot Gasket is waterproof and has memory, so it will have the same perfect seal if you take your airbox apart again. The Air Boot plate will not flex or distort and in conjunction with the Air Boot Gasket creates a perfect seal for the lifetime of the motorcycle. Sold as kits, includes the following: 1/4" thick neoprene Pro-Seal™ Air Filter Gasket, 1/8" thick 6061 T6 Red Anodized Air Boot Plate, 1/8" thick neoprene Air Boot Gasket and longer Air Boot Screws.

## PC Racing Carburetor Vent Systems

PC Racing's carburetor vent system routes the venting hoses from the carburetor upward to a foam filter equipped vent box inside the airbox. This allows fuel to drain free without hesitation and ensures continual airflow into the carburetor. Prevents fuel from vapor-lock in the standard vent hoses. Another function of the vent system is keeping water out of the vent hose in stream crossings and when washing your bike. Vent Systems are available for single and dual carburetors.

### Carburetor Vent System: Single Carburetor (Black)

Applications: All single carbureted 2 and 4-stroke ATV's, karts, motorcycles, and snowmobiles with motorcycle style carburetors.

Order No. [945-003](#)

### Carburetor Vent System: Dual Carburetor (Blue)

Applications: All dual carbureted 2 and 4-stroke ATV's, karts, motorcycles, and snowmobiles with motorcycle style carburetors. This system works great on Yamaha YFZ350 Banshee.

Order No. [945-010](#)

- Prevents bogging
- Washable filter
- Prevents flooding
- Fits all carburetors
- Velcro-mounted vent box

# Hamaguchi Exhaust Systems

## Hamaguchi Full & Slip-on Race Systems

Hamaguchi Ti full exhaust systems truly are works of art. You won't find better craftsmanship at any price anywhere. These are the same exhaust systems used by the four time FIM Asia Supersport Champion. Each pipe is hand made by skilled craftsman who use the "Wagiri" method of forming tight radius bends without disrupting flow. This method of pipe fabrication is used on GP and high end race machines. Also, variable diameter tubing is used throughout the length of piping to ensure best power is made.

Because of the many hours of research put into developing the FIM Asia championship winning machine, the power output of these systems is quite good. These fully titanium systems are very light weight with excellent flow and sound.

## Sudco Exhaust Systems

Sudco full exhaust systems are made exclusively in Japan for Sudco International. Sudco exhaust systems feature high quality stainless steel tubing that are polished to a mirror like finish. With light weight and great looks in mind; exhaust fumes exit an even weave carbon fiber exhaust canister. The Sudco exhaust systems perform just as amazing as they look with mandrel bend tubing and 4-2-1 collectors, producing strong mid-range power increases that carries all the way to redline. Available for the following models:

## Heavy Duty Cylinder Head Studs

Heavy duty cylinder studs are necessary to prevent head gasket leakage in high compression and turbocharged engines. Stock studs are made from poor material that will stretch and allow gasket leakage. APE studs are made from heat treated chrome moly and have rolled threads for maximum strength. Sold in sets.

## Heavy Duty Cylinder Head Nuts

Super heat treated cylinder head nuts are a must for high output engines. Help prevent blown and leaking head gaskets caused by the threads in the soft stock nuts stretching. APE nuts are machined from alloy steel and fully heat treated for maximum strength. Nuts are .150" taller than stock to prevent the nut from bottoming out on the stud when the head has been milled. **Note:** Packed in complete engine sets.

## APE High Performance Valve Springs

APE valve guides are made from special bronze alloy to resist wear and heat. Precision machined with the bores finished to size. They are designed to fit lower in the cylinder head to clear high lift cams, and use APE seals or factory OEM seals. Sold in sets for models listed.

## APE Titanium Valve Spring Retainers

APE valve spring retainers are machined from aircraft quality titanium bar stock in the APE plant on the latest state of the art computerized CNC machinery. Sold in sets for models listed.

## APE Kawasaki Cam Chain Idler Adapter

This adapter allows the use of later model GPz 1100 or KZ1000J cylinder head on earlier model GPz 900/KZ1000 lower end. It maintains the roller style cam chain. This is the only modification necessary to install the big valve head on early motor. Use with OEM KZ sprockets or high performance aftermarket versions.

## Assembly Lube

Provides three-times greater film strength than conventional black Molybdenum Disulfide greases and will not clog oil filters. This product clings to all surfaces and is an excellent rust inhibitor, allowing the storage of parts for years. A thin film of protection is all that is required when mating parts. Sold in 4 oz. tub.

## APE Manual Cam Chain Tensioners

**A Must for any kind of performance riding.** APE manual cam chain tensioners are CNC machined from billet alloy to exact tolerances for perfect fit. Designed to replace the automatic and hydraulic tensioners on high performance engines. The automatic adjusters can back out when the throttle is suddenly closed at high rpm. This allows the cams to go momentarily out of time and can result in bent valves and/or serious engine damage. Hydraulic tensioners have a tendency to put too much tension on the chain guide under high rpm/high oil pressure conditions resulting in premature wear. Both problems can be eliminated with the installation of the APE manual cam chain tensioner. No matter what the engine does, the cam chain tensioner will remain constant. Cam Chain Tensioners are sold each.

## White Lithium Grease

Multipurpose White Lithium Grease™ is a quality white grease (NLGI#1) specifically designed to protect engine parts. The exceptional consistency of this grease creates ease in application for all engine parts including valves, bearings, crankshafts, wheels and nut assemblies and all other areas where metal-metal contacts occur. Sold in 8 oz. tube.

Order No. **800-545**

## Synthetic CV-2 Grease

Red Line CV-2 Grease is designed to withstand the extreme temperatures and pressures which occur in high-performance wheel bearings and CV-joints. The excellent high-temperature stability, extreme-pressure protection, and water resistance enables it to out-perform even the best conventional or synthetic greases. Red Line CV-2 Grease can be used in a wide range of applications at temperatures ranging between -100° F to 500° F and provides good oxidation and corrosion resistance, low evaporation and oil separation, and has a minimum effect on rubber seals. Sold in 14 oz. tub.

Order No. **900-850**

# APE Cam Sprockets

## APE Adjustable Cam Sprocket Assemblies

*For models with Factory OEM Bolt on Sprockets*

APE manufactures the original "billet" adjustable cam sprockets. APE sprockets are necessary for precise cam timing to achieve maximum performance. APE sprockets are fully machined on the latest state of the art computerized equipment to precision tolerances and fully heat treated for extra long wear life. Its cam sprockets are used by most leading racers who demand top performance along with the safety of not chancing their expensive racing heads to reworked stock sprockets.

## APE Adjustable Cam Sprocket Assemblies

**For models with Factory Pressed on Sprockets**

APE adjustable cam sprocket assemblies allow the cam timing to be adjusted on models with factory pressed on sprockets. The CNC machined APE adapters are pressed on the cams in place of the stock sprocket. Then the slotted sprockets can be adjusted. All assemblies include two adapters, adjustable sprockets, and four bolts.

## Alternator Block Off Cover

APE alternator block off covers allow the removal of the alternator on race only bikes. Their unique design makes them a simple bolt on replacement for the alternator, which can be re-installed if desired. Complete with o-ring and mounting bolts.

### Kawasaki

ZX7 '91-'96 ABP-K750 [875-607](#)

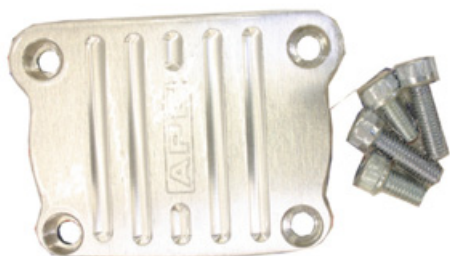

### Suzuki

GSXR750/1100 oil-cooled thru '92 ABP-S1100 [875-605\\*](#)

### Yamaha

\*This model has the top mounting ear eliminated as most racers remove the top flange from the cases to facilitate the installation of larger carbs.

## Kawasaki Kick Start Block Off Cover

Much weight can be saved by removing the kick start Assy. from Kawasaki drag bikes. APE makes it simple for the racer to remove the entire kick start mechanism from his Kawasaki. This billet cover bolts on and prevents any leaks. For Kawasaki KZ900/1000 thru 1980.

APE No. 99211 Order No. [875-630](#)

## Kawasaki Low Profile Oil Filter Cover

The original oil filter cover for lowered Kawasaki race bikes. Provides the maximum clearance under the bike. Kit comes complete with plate, special filter bolt, low profile drain plug, and allen wrench. The 2" minimum ground clearance rule is being strictly enforced by all of the drag racing organizations.

## Heavy Duty Main Bearing Studs

Heat treated chrome moly main bearing studs (case studs) are necessary to prevent the cases from moving around under power in high output engines. These high strength studs help to prevent crankshaft damage. Made from the same special chrome moly that are used in APE cylinder studs. All threads are rolled after heat treat for maximum strength.

## K&N Oil Filters

K&N Oil Filters are TUV production monitored. Synthetic filter media provides outstanding filtration at high-flow rates with less pressure drop and will not break down with today's synthetic oils. 17mm hex nut on spin-on oil filters for easy wrench-off installation with cross drilled safety wire holes. Higher burst point than OEM with heavy-duty, steel outer construction. (spin-on filters) Anti-drain back valve (where applicable) and pre-lubed base gasket ensures a tight seal. Sold each.

# PC Racing Oil Filters

## FLO® Stainless Steel Reusable "Spin On" Oil Filters

This should be the last oil filter you will ever buy! Made from laser cut, medical grade, 304 stainless steel micronic filter cloth. This filter provides 200% more filter area in many cases. Our stainless filter catches items down to 35 microns, which is about 3 times better than most good paper or brass filters. Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600 degrees.

- Cleanable and Reusable
- Superior Filtration – 35 microns!
- Proven Aerospace, NASCAR
- Indy and Formula 1 Technology
- High Flow Rate
- Easy Filter Element Inspection
- Unaffected by Water
- Heat or Pressure
- Environmentally Friendly
- Pays for itself

**“Works” Triplestar Alloy Sportbike Sprockets**

Here's the most cost effective performance and handling improvement modification you can make to your Japanese sportbike. Sunstar Engineering's lightweight 7075-T6 heat treated aircraft grade aluminum Triplestar Sportbike Sprockets save more than 2 pounds of weight over stock steel sprockets to reduce unsprung suspension and reciprocating drive train weight without sacrificing strength. The result is improved handling, quicker acceleration and braking. Combined with a gear ratio change the performance gain can be even more impressive! Each rear sprocket features a computer machined lightening pattern and is completed with an attractive gold anodized finish. Sunstar Triplestar Sportbike Sprockets are used by Team Vance & Hines/Yamaha Superbike and Team

**Sunstar OEM Quality Steel Replacement Sprockets**

The same precision quality original equipment sprockets demanded by Japan's leading motorcycle and ATV manufacturers are available as replacement sprockets in America from Sunstar Engineering. Choose from a complete line of rear sprockets featuring Original Equipment designs of heat treated 1045 High Carbon Steel Rear Sprockets for durability, both in stock and a wide range of optional rear ratios for increased performance or economy. For all front sprocket applications there's Sunstar's Chromoly Steel Countershaft Sprockets which are also heat treated for indestructible strength and durability.

**Chain custom cut to your specific length requirements. Ask your sales rep.**

## RK X-Ring (XSO) Chain

RK's X-Ring chains feature an X-Ring shaped seal. The X-Ring has two lubrication pools and seal points versus the single seal point/pool design of a regular o-ring chain. X-Ring technology offers less torsional friction, increased high-stress performance, and a 30% longer wear life compared to standard o-ring chains. X-Ring chains offer tremendous value, plus true quality and performance for all but the most demanding high performance applications.

## Redline Suspension Fluids

Red Line Suspension Fluids provide very good shear stability which means that they should not degrade with use. They change very little with temperature and will provide lower operating temperatures for the same viscosity when compared to conventional suspension fluids. They are also very low forming and provide good seal lubricity and antiwear properties. They can be blended together in any proportion to achieve an intermediate viscosity. For use in cartridge forks and motorcycle shocks. Sold in 16 oz. bottle.

Description	SAE Weight	Order No.
Like Water Suspension Fluid no	No SAE rating	<b>900-860</b>
Extra Light Suspension Fluid	2.5wt	<b>900-861</b>
Lightweight Suspension Fluid	5wt	<b>900-862</b>
Medium Suspension Fluid	10wt	<b>900-863</b>

## Cartridge Pro Fork Fluid

## How to order Vesrah Brakes from Sudco

**Brake Pads:** All pads have a "610" prefix.

### Brake Pad Compounds:

Kevlar/Carbon Pads have a simple 3 digit suffix "610-134".  
Sintered Metal Pads have a "JL" after the 3 digit suffix "610-134JL".

### Compound Specification:

**Kevlar/Carbon** - Since the elimination of asbestos in the Vesrah product line, Kevlar has been the standard brake pad material since 1990. Kevlar/Carbon pads are very temperature stable and have a high coefficient of friction for sure footed braking under all conditions, and are stainless steel rotor safe.

**Sintered Metal** - The sintered Metal "JL" pads from Vesrah feature the latest generation of high performance friction materials. Sintered metal pads are a mixture of copper, tin, graphite and other materials resulting in a brake pad with very high performance characteristics, especially in wet conditions. Sintered pads are stainless steel rotor compatible.

**Brake Shoes:** All shoes have a "611" prefix.

### Brake Shoe Compounds:

Standard Kevlar / Carbon Shoes have a simple 3 digit suffix "611-150"  
Grooved shoes have an "NS" after the 3 digit suffix "611-150NS".

### Compound Specifications:

Grooved brake shoes offer more consistent performance in wet conditions and higher friction levels for motocross and offroad racing than with standard shoes.

# Racing Brake Pads

## Vesrah Racing Brake Pads (for Street)

Vesrah R<sub>JL</sub> and SR<sub>JL17</sub> high performance racing pads offer superior stopping power without fade. Sintered metal pads produce increased braking performance with one touch finger braking. Used by Vesrah Suzuki Racing team in USA and many other professional road race teams.

Made in Japan.

## Nology Hot Wires

Hot Wires are engineered with a unique built-in capacitor that allows energy from the ignition coil to accumulate (stored) until the voltage can be released as an ultra-short, ultra-hot spark. Combustion is faster and more complete, resulting in increased horsepower and a more complete burn. Hot Wires are compatible with all aftermarket or stock ignition systems. Electronic ignitions are preferred but satisfactory results are achieved with point ignition when the points and condenser are in perfect working order. Each Hot Wire includes a 23" or 30" black silicone Hot Wire with grounding strap, 90 degree or 180 degree (straight) spark plug cap, in-line wire connector and heat shrink tubing. Sold each. **Note:** Requires non-resistor spark plugs.

## Nology Pro Fire Compact Ignition Coils

Pro Fire ignition coils utilize advanced technology to supply the energy needed for trouble-free high performance and high rpm operation. They are designed to have the quickest rise time along with substantial energy reserves. Spark voltage is in excess of 45,000 volts over the entire rpm range. Pro Fire coils come in single or dual high tension towers and are available in 0.3 ohm, 0.6 ohm, 1.5 ohm and 3.0 ohm. Coil connectors and boot are included. Sold each.

**Note:** To determine which Nology ignition coil to use, measure the primary winding resistance of your stock ignition coil. Round down to the nearest whole ohm.

0.5 ohm and 0.6 ohm primary resistance ignition coils are for C.D.I. type ignitions found on late model ATV, Dual Sport, MX. and Offroad.

**Note:** Do not use Nology Ignition Coils on point type ignitions or on the following models: Honda VFR, CB, CBX; Kawasaki ZX10, GPZ, KZ1000J, Z1-900; Suzuki GSXR (early oil cooled), GS; Yamaha FJ1100/1200 and VMX12 V-Max.

## Dynatek "Dyna" Ignition Wires

Dynatek "Dyna" wires are made from high grade, silicon jacketed, high tension cable. All wires are supplied with spark plug boot and loose coil terminals. Dyna wires are available in solid copper core and graphite suppressor. Use Dyna solid core wires where electrical interference is not an issue. Use Dyna suppressor wires for applications with electronic advance ignitions or other sensitive electronic equipment. Both wire types ensure maximum energy transfer.

**Note:** DW200, DW300, DW600, and DW800 wire sets include parts for 4-cylinder models. DW1100 and DW1200 include parts for 2-cylinder models. Sold in sets in different colors.

## Dyna Ignition Coils

Dyna Ignition coils are high tech, top quality coils designed for maximum performance. They produce spark voltages in excess of 30,000 volts and spark energies second to none. Dyna coils are available in a wide variety of resistances and output configurations to allow easy replacement of stock coils. Dyna coils work with factory electronic ignitions, points and aftermarket ignitions. Before selecting a coil, check the coil primary resistance requirements as specified by the manufacturer of the ignition being used. All Dyna coils are sold in pairs unless otherwise noted.

## PC Racing Engine Hour Meter

Automatically records and displays your engines accumulated run time, so oil changes, piston, rings, valves, spark plugs, etc. can be serviced at the correct maintenance schedule. The correct schedule saves costly engine damage from service neglect. Motominder can also save money from servicing too frequently. The smallest engine hour meter available (approximately 1" x 1.5") doesn't require additional mounting bracket and can be easily mounted by the peel and stick method to the frame or other convenient area. PC Racing is so confident that motominder is the most reliable engine hour meter available. It is backed by a 2-year manufacturer's replacement warranty.

Works with all Gas Engines.

A low odor, fast setting, non slumping paste that cures at room temperature to a rubbery solid. This multi-purpose RTV silicone sealant can be used in numerous bonding and sealing applications such as pumps, gearboxes, marine cabins, windows and electrical boxes. Sold in 3 oz. tube.

Order No. [800-213](#)

## Case Sealant Liquid Gasket TB1184

A semi drying synthetic rubber liquid gasket which is resistant to oil, water, chemicals and gasoline. Application areas include sealing transmission case covers, 2-stroke crank cases, timing chain cases, side covers, 2-piece cylinders, clutch housing bolts and oil filter mounting surfaces. **Note:** Replaces TB1104.

Temperature range from 40° F to 302° F. Sold in 100 g. tube.

Order No. [800-215](#)

## Gasket Maker Gray TB1200GAU3Z **NEW**

RTV sealant (gray) high viscosity, gasket maker. OEM specified product with good elasticity. Temperature, and chemical resistant. Resists oil, water, coolants, and gasoline. Excellent as general purpose LGM with high resistance to heat and cold. Sold in 3.8 oz. tube.

Order No. [800-216](#)

## Gasket Maker Gray TB1217H **NEW**

This is a great LGM where difficult or loose fitting components are used. Can be loaded up-side-down and it's fast setting properties allow for assembly within seconds of application. It's high resistance to motor and gear oil make it an excellent choice for transmission and drive train assembly. Sold in 5.0 oz. cylindrical tube with applicator tip.

Order No. [800-218](#)

## Gasket Maker Black TB1207B **NEW**

One of the finest RTV LGM's available any where. It is particularly good with adhesion to both plastic and metal. The proprietary formulation features advanced elongation properties and is exceptional in uses where extreme vibration, torque, and heat are involved. Sold in 3.4 oz. tube.

## Hylomar Gasket Maker and Thread Sealant

Hylomar can be used as a dressing or a gasket maker. It is non-hardening and is impervious to chemicals such as fuels, oils and antifreeze. It makes an excellent dressing for any cut gasket where temperatures remain below 600° F. The product will form a gasket if used by itself when sealing a gap of less than 0.010 inch between precision machined surfaces. A Hylomar treated joint can be disassembled, inspected, and reassembled without reapplication. Sold in 100 gram tube and 250 ml. brush-cap can.

## Epoxy-Putty™

Epoxy-Putty is a steel reinforced, kneadable product that mixes like putty, bonds like epoxy, and hardens like steel. It is extremely tough and durable and adheres to a wide range of metals as well as PVC, plastic, ceramic, fiberglass, glass and wood. Epoxy-Putty sets up under water and is impervious to chemicals, and has a shelf life of three years. After one hour, it can be drilled, tapped, filed and machined. Cured Epoxy-Putty will withstand temperatures up to 500° F. Sold in 2 oz. clear cylinder with cap.

Order No. 800-540

## All-In-One RTV Silicone

Premium-grade RTV silicone that does it all. RTV silicone is oxygen sensor safe, has a low volatility rating, is usable from 80 °F to 600 °F, and is solvent resistant. Choose from Aluminum or Clear. Sold in 3.0 oz. tube.

Order No. 800-510

## Non-Metallic Anti-Seize

Non-Metallic Anti Seize lubricant contains no metals and is safe to use on stainless steel and other sensitive alloys. The compound is specifically designed to protect against galling, erosion and sealing. Non-metallic Anti Seize makes for easier disassembly. It can be used on pipe threads, pump and valve packing, low speed bearings, shafts, gears and cable or use as a dry film lubricant. Sold in 8 oz. can with brush.

Order No. 800-550

## Solvent 184™

Solvent 184 is a great cleaner of electrical contacts, brakes, alternators, electric motors, starters, machined surfaces and much more. It removes tar, wax and petroleum products, and may be used to prepare surfaces for application of sealants and adhesives. Solvent 184 is non-flammable, easy to use and comes in a non-aerosol can with a built-in nozzle cap that reduces waste. Sold in 16 oz. nozzle-top can

Order No. 800-555

## Gel Lube

Engine assembly is made easier, quicker, and cleaner with Valco's premier lubricant—GelLube™. GelLube sprays on thin and penetrates quickly—transforming into a heavy-duty, load-bearing, protective gel. GelLube does not drip, melt or shift when applied. GelLube bonds to metal surfaces and fills all small spaces and crevices on valve springs, cranks, cams, bearings and much more. Sold in 8 oz. can.

## Red Line Suspension Fluids

Red Line Suspension Fluids provide very good shear stability which means that they should not degrade with use. They change very little with temperature and will provide lower operating temperatures for the same viscosity when compared to conventional suspension fluids. They are also very low forming and provide good seal lubricity and antiwear properties. They can be blended together in any proportion to achieve an intermediate viscosity. For use in cartridge forks and motorcycle shocks. Sold in 16 oz. bottle.

Description	SAE Weight	Order No.

## High Performance Motorcycle Oils

Red Line's High Performance Motorcycle Oils are fully-synthetic formulas specifically created for the high demands of the latest high-revving four-stroke motocross bikes, ATVs, Sportbikes, and V-Twins. Available in popular viscosities of 10W30, 10W40, 20W50, and 20W60, these ester-based products contain the anti-wear chemistry demanded by mechanics and enthusiasts. This oil also features lower levels of friction modifiers for superior wet clutch operation. Excellent thermal stability, oxidation resistance, cleanliness, and ability to lubricate hot metal make Red Line High Performance Motor Oil a superior lubricant. Recommended for JASO MB, API SJ, SG, & SH. Sold in quart bottles.

## Two-Stroke Racing Oil

Red Line's popular two-stroke lubricants contain base oil which have the highest film strength and greatest affinity for hot metal. Because Red Line is a superior high temperature lubricant, it can be used at lower fuel to oil ratios, increasing power and providing excellent scuff protection and cleanliness. Where many two-stroke oils are recommended to run 32:1, many Red Line customers often mix at a leaner 40:1. Red Line provides the lubricating cleanliness, with low carbon residue that dramatically reduces plug fouling and smoke. Red Line provides special protection for formulated fuels. Dyno proven to make more power over longer periods of operating time. Sold in 16 oz. and gallon bottles.

## Synthetic Racing Oil

Red Line's racing synthetic oils are made with the most thermally stable synthetic base stocks available and provide the best high-temperature lubrication and a higher film strength than any petroleum or synthetic on the market today. Although Red Line racing oils are categorized as "straight grades", their low-temperature properties make them exceptional multigrade, allowing 2-4% more power than an oil of similar viscosity, while providing much more protection. Each reduction in viscosity grade allows 1-2% more power. To reduce the chance of detonation, Red Line race oils contain very few detergents and are not recommended for street use. Sold in quart bottles.

## ShockProof™ Gear Oil

A unique lubricant containing a suspension of solid microscopic particle as an extreme pressure agent—unique solid dispersion which cushions gear teeth to help prevent tooth breakage and allows the use of lower viscosities. The viscosity characteristics allow the lubricant to resist throw off and provide a film thickness greater than an SAE250 grade, with the same low fluid friction as with 80W140. Recommended for heavily-loaded racing differentials and transmissions, Off Road racing and problem gearboxes. Offers a “best of both worlds” balance of relatively low drag and utmost in protection. Sold in quart bottles.

## SI-1 Complete Fuel System Cleaner

SI-1's injector and valve detergent is a concentrated package of the most powerful high-temperature detergents available to clean gasoline fuel injectors or carburetors, intake valves and combustion chambers. and can clean injectors to nearly 100% efficiency in one treatment. The cleansing effect on injector deposits can raise fuel economy 12% or even greater depending on the condition of the injectors. SI-1 also contains detergents and a synthetic upper cylinder lubricant which will help clean pollution control valves and can reduce octane requirements by two numbers. SI-1 also protects the fuel system from rust. Sold in 15 fl. oz. bottle.

Order No. **900-870**

## Water Wetter®

Water Wetter is a unique wetting agent for cooling systems which reduces coolant temperatures by as much as 30° F. This liquid product can be used to provide rust and corrosion protection in plain water for racing engines, which provides much better heat transfer properties than glycol-based antifreeze. Or it can be added to new or used anti-freeze to improve the heat transfer of ethylene and propylene glycol systems. Designed for modern aluminum, cast iron, copper, brass and bronze systems. Compatible with all antifreezes, including the latest long-life variations. Sold in 12 fl. oz. bottle.

Order No. **900-842**

## 4-Stroke Alcohol Fuel Lube

Red Line Alcohol Lube is designed to combat corrosion and water absorption within the fuel system of alcohol burning racing engines. This specifically developed product will provide lubrication for all system components as well as the upper cylinder, resulting in a much longer component life when compared to straight alcohol. Sold in 12 fl. oz. bottle.

Order No. **900-844**

## 80W Motorcycle Gear Oil with ShockProof™

Designed for applications like two-stroke bikes, shifter karts, the CRF250/CRF450 transmission. Used where an 80W oil is called for, ShockProof's microscopic solid medium provides cushioning between gear teeth, while maintaining lower drag. Reduces the thinning effect from high temperatures. Sold in quart bottle.

# K&N Filter Oil, Rustol & Chemical Accessories

## Rustol

Rustol gives excellent results with little or no work required. It is safe and non-corrosive to all metals, rubber coatings and paint. While destroying existing rust, it forms a protective bond that prevents raw rust from forming later. Rustol is odorless unlike conventional rust removers and is shipped in a concentrated form. Believe it or not, the same batch of Rustol can be used many times. Note: Rustol should be diluted according to instructions before use. Available in 1 quart, 1 gallon, and 20 liter.

Order No. 021-440

## Super BN Series Square Pump Type Carburetors

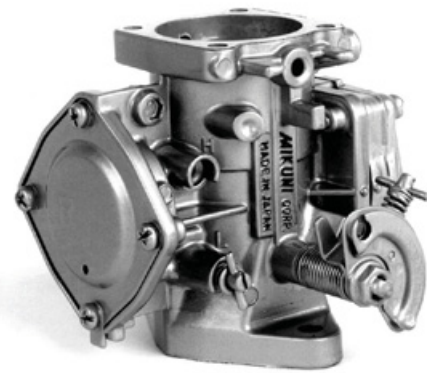

Super BN series carburetors feature improved air flow, higher capacity fuel pump, externally adjustable metering screws and replaceable fixed jets for easy high and low speed tuning. Special needle valves and springs give optimum pop-off pressure. **Made in Japan.**

**Performance 44mm single** BN44-40-8067 **001-096**

For most sit-down models requiring larger jets. Features a 2.5 viton tip needle valve, #120 pilot (slow) jet, #140 main (high) jet, primer fitting and owners manual. (No butterfly choke)

**Performance 38mm single** BN38-34-8113 **001-091**

Replaces most standard BN or Super BN carbs. Features a 2.0 viton tip needle valve, #65 pilot (slow) jet, #107.5 main (high) jet, primer fitting and owners manual. (No butterfly choke)

## Pro Racing Super BN46 Series Carburetor

Designed to give Pro Level Racing performance. Features a viton 2.5 needle valve, #120 pilot (slow) jet, #150 main (high) jet, primer type cold starter fitting, angled fuel fittings and owners manual. (No butterfly choke) **Made in Japan. Note: Bolt pattern is same as BN44, some porting may be necessary for maximum air flow.**

**Performance 46mm Single** BN46-42-8002 **001-099**

## Sudco Mikuni Tuning Manual

This 92 page manual includes exploded parts views, parts listings and optional parts. Guides you through tuning and trouble shooting for the popular lines of Mikuni Carburetors. The definite reference for Mikuni Carburetors and a must for any do-it-yourself type. Sold each.

Order No. **002-999**

## Mikuni Pocket Tuner

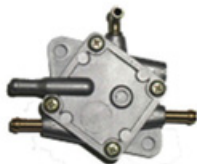

A handy pocket-sized calculator which can be used to determine required jetting changes in Mikuni carburetors due to climate and temperature changes. The Pocket Tuner is applicable to both single and multi-carburetor applications on 2-stroke and 4-stroke engines. It also has a guide for determining lean or rich carburetor conditions.

## PC Racing Engine Hour Meter

Automatically records and displays your engines accumulated run time, so oil changes, piston, rings, valves, spark plugs, etc. can be serviced at the correct maintenance schedule. The correct schedule saves costly engine damage from service neglect, but Motominder can also save money from servicing too frequently. The smallest engine hour meter available (Approximately 1" x 1.5") it doesn't require additional mounting bracket and can be easily mounted by the peel and stick method to the frame or other convenient area. PC Racing is so confident that motominder is the most reliable engine hour meter available that it is backed by a 2-year manufacturer's replacement warranty. Works with all Gas Engines.

## Two-Stroke Racing Oil

Red Line's popular two-stroke lubricants contain base oil which have the highest film strength and greatest affinity for hot metal. Because Red Line is a superior high temperature lubricant, it can be used at lower fuel to oil ratios, increasing power and providing excellent scuff protection and cleanliness. Where many two-stroke oils are recommended to run 32:1, many Red Line customers often mix at a leaner 40:1. Red Line provides the lubricating cleanliness, with low carbon residue that dramatically reduces plug fouling and smoke. Red Line provides special protection for formulated fuels. Dyno proven to make more power over longer periods of operating time.

Sold in 16 oz. and gallon bottles.

# Terms & Conditions

## General Policy

Sudco International sells wholesale only to legitimate motorcycle businesses (licensed, established commercial places of business serving the general public in areas of motorcycle sales service and/or parts and accessories). Our bona fide dealers deserve protection against others selling wholesale and competing unfairly with legitimate dealers. We request that our dealers completely fill out our application sheet and return it to us. Upon approval as a bona fide Sudco dealer, we will send you our dealer price list and ordering instructions.

**We reserve the right to refuse to sell to anyone not meeting our customer requirements.**

## Payment Terms

All orders will be shipped COD/money order or credit card unless company check approval or open account status has been established. Dealers requesting an open account or COD company check acceptance should request an application, specifying the method of payment. Allow four to six weeks after our receipt of the completed application for approval. Open account is forfeited for past due accounts and the account is put on a COD status. Protect your open account status by paying within the 30 days agreed. Late charges will be applied to accounts not paid on time at a rate of 1-1/2% per month (18% per year). Service charge, collection agency fees, actual attorneys fees, interest and other expenses incurred in the collection of past due accounts will be added to the balance due up to the maximum amount allowed by law

**ACCOUNTS ON WHICH WE ARE HOLDING AN NSF CHECK WILL BE PLACED ON A COD/MONEY ORDER ONLY STATUS WITH THE POSSIBILITY OF A 50% PREPAY REQUIREMENT ON ALL FUTURE ORDERS. There will be a \$25.00 charge on ALL RETURNED CHECKS.**

## Minimum Orders

Our minimum order is \$25.00.

To remain active as a dealer, you must purchase at least \$500.00 of Sudco product per calendar year.
